Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1 – 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. patent 4,858,190 to Yamaguchi in view of U.S. patent 5,282,164 to Kawana.

With regard to claim 1, Yamaguchi teaches shifting unit SR (col 3 lines 45+) and selection unit C-DCR, wherein the selection unit selects a column via the use of a column decoder as described in col 3 lines 50+. Yamaguchi also teaches the use of shift registers SR, wherein "in the shift register SR, the selection signal of the logic "1" is set at a bit corresponding to the complementary data line of the memory array indicated by the column address signal" (col 3 lines 53+).

Yamaguchi does not however teach sending this serial data into parallel mode.

Kawana teaches shifting serial data into a parallel mode through the use of a shift register. See col 5 lines 5+.

It would have been obvious to one of ordinary skill in the art at the time of the invention to have shifted the data in the shift registers of Yamaguchi into parallel format, In light of the teachings of Kawana, in order to provide an efficient means for transmitting the data in applications where parallel mode is required.

With regard to claim 2, see the above and note that 2n-1 would be an obvious choice for the number of columns.

With regard to claim 3, it would be obvious to have not every one of the shift registers in Yamaguchi and Kawana store data values.

With regard to claim 4, see feedback in col 3 lines 45+ of Yamaguchi.

With regard to claim 5 and 6, see the rejections above.

With regard to claim 7, see the teachings of Kawana generally.

With regard to claims 8 – 10, see the rejections above.

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Steven Blount whose telephone number is 571 - 272 - 3071. The examiner can normally be reached on M-F 9:00 - 5:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mr. Chau Nguyen, can be reached on 571 – 272 - 3126.
